SUMMARY

Results-driven E-commerce and Digital Marketing specialist with a background in UX research and AI. Experienced in full-cycle e-commerce operations, technical platform management, and UAT leadership, combined with end-to-end marketing strategy, paid media, and brand development. BCS Award winner for research into Generative AI and user engagement. Seeking opportunities in Spain within e-commerce, digital marketing, or UX research.

EDUCATION

University of West London Creative Computing • 1st Class

London • September 2021 - May 2024

Dissertation: Generative AI in Virtual Reality for Microbiology - Designed, developed and evaluated BioVRium, an AI-enhanced VR educational platform built in Unreal Engine 5. Integrated generative AI characters via CONVAI, conducted two user studies with 41 participants, and proved through statistically significant results (Mann-Whitney U-Test, $p=.026$) that AI-enhanced VR leads to higher learning outcomes and usability than VR alone. Awarded BCS London West Branch Prize by The Chartered Institute for IT.

Notable Project: Spiderbrave - designed and developed a VR game using exposure therapy principles to help users overcome arachnophobia.

EXPERIENCE

Jersey Electricity | Powerhouse (E-commerce & Retail Brand) Jersey

Digital & Marketing Executive May 2025 - Present

E-commerce & Technical Operations

- Assumed full ownership of day-to-day e-commerce operations for Powerhouse's online store, overseeing product listings, pricing, promotions, and platform health
- Led UAT testing for a full e-commerce platform redevelopment project in partnership with an external development agency, identifying critical issues and signing off testing phases
- Independently diagnosed and resolved ERP system errors, preventing significant operational disruption to order processing
- Managed technical SEO, site error resolution, and engaged developers for infrastructure support
- Independently managed upload and SEO optimisation of 2000+ products including meta titles, descriptions and blog content

Marketing & Brand

- Delivered 660% Instagram follower growth and 231% Facebook follower growth within 10 months
- Generated 7.6M+ total views across Meta platforms and 37,600 link clicks, directly supporting e-commerce sales
- Managed Meta and Google ad campaigns achieving peak ROAS of 230x through data-led optimisation
- Conceptualised and executed full brand campaign for new gaming PC range including professional photo and video shoot, press coverage, and negotiated venue partnership with local gaming hub
- Delivered fitness campaign generating 20% YoY profit increase through end-to-end production including talent sourcing and photoshoots

- Led email marketing strategy, graphic design, content creation, PR, and events
